TOWER

1730mm height

SlimLED under-shelf LED strip lighting

GlassMax canopy with **Mitrex** frame

Height adjustable and 'tiltable' shelving:
6 display levels
(7 in heated cabinet)

Flush finished base

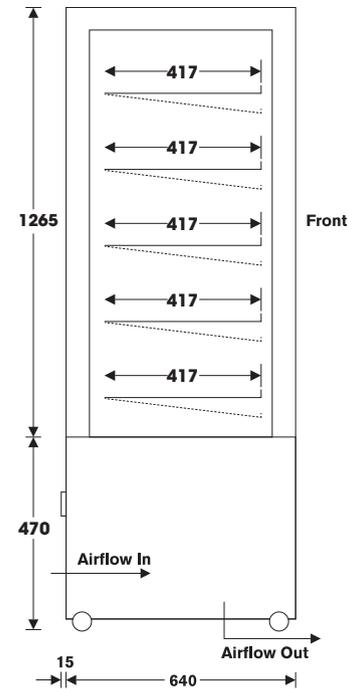

Swivel and lockable castors

TC12

STANDARD FEATURES

- › **GlassMax** minimalist canopy (more glass/less frame) that maximises the visibility of displayed food from all angles
- › **Mitrex** frame that is flush welded with mitred joints to give both robustness and a designer finish
- › Six food display levels: five shelves plus bottom trays
- › Chrome wire shelving system that is height adjustable in 25mm increments and interchangeable between horizontal and tilted positions
- › **CrumbCatch** feature in bottom trays that collects falling crumbs and food
- › High quality European refrigeration components
- › Fan forced air flow for even temperature distribution
- › **ClearView** front glass for condensation control
- › Refrigeration optimised to provide a high humidity environment that maintains food quality for longer
- › **DuraCoat** protective coating on the refrigeration coil to prevent food acid corrosion
- › **SureVap** self-evaporating system for condensate—no drain required
- › Condenser air vented through base—no unsightly vents
- › **SlimLED** under-shelf LED strip lighting with 12V safety
- › Four split-level, rear sliding, double-glazed doors on friction-free, low wear tracks (doors removable for cleaning)
- › Mounted on swivel and lockable castors allowing easy movement of cabinet

FACTORY OPTIONS

SlimLED under-shelf LED strip lighting

Frameless canopy option: double-glazed glass canopy

Glass shelving option

Black powder-coat base option

Front Sliding Doors

Front sliding doors of the same design as Festivé rear doors are an option for any Tower, York, Regent, Devon or Cornwall cabinet.

DC112 (front doors)

DEVON GLASS TOP CONVERSION

The stainless steel lid of a Devon cabinet can be converted to a glass top. This is a good option where Devon cabinets are placed on low counters or plinths.

DCC9 with glass top

Hinged Doors

Hinged doors can be fitted to most cabinets and are offered as a stylish alternative to sliding doors.

RC6 (hinged rear door)

FRAMELESS AMBIENT BOX ON TOP (SINGLE-GLAZED GLASS)

Ambient boxes with doors and LED lighting can be built atop York or Regent cabinets. To achieve an immaculate and seamless finish the glass edges are bonded using a special UV adhesive process.

RC12 with ambient box

PART POWDER-COAT

This option allows selective powder-coating of just the frame in Tower, York, and Regent cabinets; or just the lid and posts in Devon, Cornwall and Lincoln cabinets. Suitable for when the base of a cabinet is pushed up against joinery.

YC12 with frame powdercoat only

FRAMELESS CHILLED: DOUBLE-GLAZED GLASS

Frameless cabinets provide a stylish glass on glass look for high-end food display. Frameless refrigerated cabinets with multi-level display require black edge banding of the glass to obscure the double-glazing detail. Available with any Tower, York, Regent or Devon cabinet.

Frameless RC15

FULL POWDER-COAT

This option gives a full powder-coat to all the exterior metal, including the posts or frame

YC12 full powdercoat

COPPER OR BRASS FRAMING

This option allows edge framing of the canopy with copper or brass angle for Tower, York, Baker, Regent and Devon Cabinets.

YC12 with brass framing and full black powdercoat

MOBILE JOINERY

A stylish range of mobile joinery units designed to compliment the Somerset servery displays. Specified with high pressure laminate top, melamine side panels, and doors to one side. Also fitted with ventilation grills if required and mounted on lockable castors for ease of movement. A full range of standard colour choices are available, including woodgrain finishes.

Servery Joinery with SC15 fitted

FRONT VENTING

If Chilled floor-standing units (Towers, Yorks, Bakers, Regents or Lincolns) need to be backed up hard against a wall, the cabinets can be front vented. This requires fitting a louvred front base panel and may require the base to be raised from 470 to 520mm H.

TC12 with front venting

BOIL-OFF UNIT FOR SOMERSET CHILLED AIR CURTAIN

This is suitable where defrost drainage to waste or into a bucket is not possible. It is particularly useful for mobile servery units.

Boil-off unit

EXTENDED CANOPY FOR EXTERIOR CLADDING

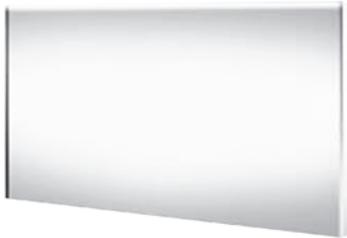

The glass canopy of a cabinet can be extended forward up to 100mm to allow an exterior cladding such as tiles or wooden panelling to be fitted to the base, flush with the canopy.

RC12 with wood panelling

MIRROR GLASS

Mirror glass can be specified on the doors, side panels or rear panel (with front sliding doors).

GLASS SHELVES

Suited for cake and patisserie style displays

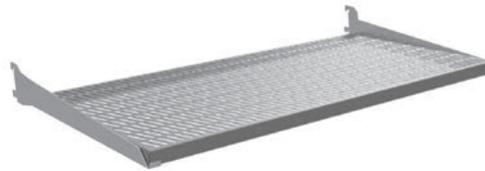

TRAY RACES OR PREP BENCHES

Detachable front and/or rear tray races and prep benches can be attached to any counter top or floorstanding cabinet. Can be specified with or without bag and/or tong holders.

STAINLESS STEEL PERFORATED SHELVES

Suited for drinks and heavy load displays

HANGING RAILS

Single or triple bar hanging rails can be fitted to any framed cabinet.

FIXED TICKETING STRIP

Fixed to the front of the shelf this option allows ticketing of displayed product.

TEMPERATURE AND HUMIDITY SETTINGS

1. Controlled Ambient

A refrigerated cabinet can be configured and set to 'controlled ambient' conditions of 10-14°C or any temperature required.

2. Low Humidity

A refrigerated cabinet can be configured to deliver a low relative humidity environment for special applications, such as chocolate display

CUSTOMISED DIMENSIONS

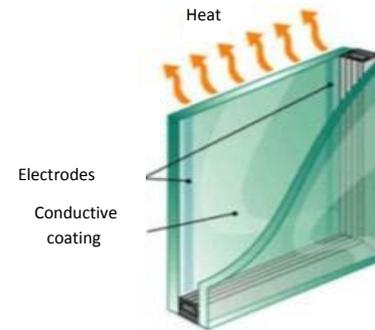

A cabinet can be customised to the specific height, length or depth dimension required. Increasing or decreasing the height of a cabinet is straightforward. Making changes to cabinet length or depth is also possible.

CONDENSATION CONTROL

Electrically Heated Glass

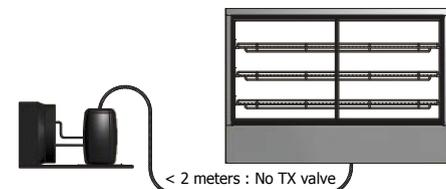

Using special conductive film the outside pane of double-glazed glass is electrically heated. This is suitable for high humidity environments where 100% condensation prevention is required.

REMOTE REFRIDGERATION

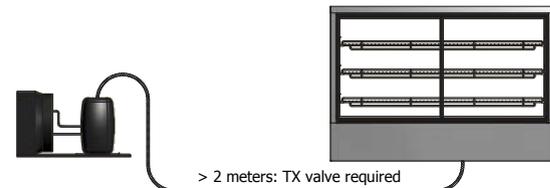

1. Remote Counter top Cabinets with Capillary (no Tx valve)

Based on capillary metering, this is an option for counter top cabinets where the connection distance is less than 2 meters.

2. Remote Cabinets with Tx valve

This is required for all remote installations where the connection distance is greater than 2 meters.

ACCESSORIES

THERMAL SPACER

These 30mm wide stainless steel spacers are energy saving by minimising thermal transfer between hot and cold units

CLIP-ON TICKETING STRIPS

These removable ticketing strips are 90mm long and come in packs of 10.

TONG HOLDER

Internal Diameter: 100mm
